

# M-4 .45/.410

When used as a Survival Weapon the maximum range of the 3-inch .410 Shot cartridge with 1 1/16 Oz. of shot will vary from 15 to 20 feet depending on the size of shot used and how difficult the small game you are shooting at is to kill. Rattlesnake are a lot harder to kill than quail. The pattern size is approximately 12 inches in diameter at 6 feet and 24 inches in diameter at 16 feet. We recommend number 7 1/2 or number 9 shot for shooting snakes. The large the pattern size makes it easy to hit snakes and other small game.

The .45 Colt or the .410 Buck Shot (3 pellets of .000 Buck Shot) can be used to shot larger game.

Also available in Double Barrel .45 Colt, .44 Magnum, & .357 Magnum.

## Specifications
